

FITBUDDY - AI FITNESS PLAN GENERATOR USING GEMINI MODELS

Phase 7: Project Documentation Phase

This phase focuses on preparing complete technical and project documentation.

The documentation includes:

Project Introduction

- Background of FitBuddy.
- Problem statement.
- Project objectives.
- Scope of the application.

Technology Documentation

- Python.
- FastAPI.
- Uvicorn.
- Google Gemini API.
- SQLAlchemy.
- SQLite.
- Jinja2.
- HTML/CSS.

System Documentation

- System architecture.
- Application workflow.

- Database structure.
- API routes.
- AI integration.
- Frontend structure.

Development Documentation

The implementation of:

- Workout generation.
- Nutrition tip generation.
- Feedback-based plan updates.
- User storage.
- Administrative view.

Testing Documentation

- Test cases.
- Test results.
- Screenshots.
- Error handling.
- Local deployment verification.

User Interface Documentation

Screenshots and descriptions of:

- Home page.
- Workout generation page.
- Workout plan.
- Nutrition tip.
- Feedback page.
- Updated plan.

- Admin/user view.

Outcome:

A complete project report and technical documentation describing the design, development, testing, and deployment of FitBuddy.
